PROFESSIONAL SUMMARY

B.Tech student in Electronics and Communication Engineering with a strong interest in embedded systems, IoT, and hands-on electronics. Through internships, workshops, and projects, gained practical experience in PCB design, circuit simulation, and microcontroller-based systems. Actively takes part in hackathons, ideathons, and idea submission programs like YIP to apply classroom learning to real-world challenges.

EDUCATION

St. Joseph's College of Engineering and Technology, Palai (Autonomous) Expected 2027
B.Tech in Electronics and Communication Engineering

St. Aloysius Higher Secondary School, Edathua Completed 2022
Higher Secondary Education (Class XI & XII)

St. Mary's Girls High School, Edathua Completed 2020
High School (Class X)

TECHNICAL & SOFT SKILLS

- **Core Programming & Hardware:** C, Python, MATLAB, Verilog, Assembly Language, Microcontrollers (ESP32, Arduino), Sensor Interfacing, PCB Design, Circuit Simulation.
- **Data Science & Analysis:** Pandas, NumPy, Matplotlib, Seaborn.
- **Design & Presentation Tools:** Figma, PowerPoint, UI/UX Design Principles, Wireframing, User Research.
- **Soft Skills:** Leadership, Team Management, Problem-Solving, Team Collaboration, Adaptability, Effective Communication.

EXPERIENCE & INTERNSHIPS

UI/UX Design Intern (Design Associate L1) Jun 2025 – Aug 2025
Infotact Solutions (Remote)

- Collaborated with web development and product teams to design intuitive, user-centered interfaces.
- Created wireframes, mockups, prototypes, and user flows using Figma based on project requirements.
- Conducted user research, interviews, and usability testing to gather insights and validate design decisions.

Data Science with Python Trainee Jun 2025 – Aug 2025
Main Flow Services and Technologies Pvt. Ltd.

- Completed comprehensive training focused on data-driven problem-solving and real-world applications.
- Utilized Pandas and NumPy for extensive data preprocessing and analysis.

Embedded AI & AIoT Intern Feb 2026 – Apr 2026
IICT GmbH Training Academy, Germany (Hybrid)

- Completed an intensive Project Readiness and Internship Program focused on Embedded AI and AIoT.
- Executed guided project modules and participated in hands-on laboratory sessions to build practical competence in hybrid hardware-software environments.

PROJECTS

Smart Gas Stove | *IoT, ESP32 WROOM* 2026

- Upgraded a conventional gas stove into a smart, self-monitoring appliance using an ESP32 microcontroller to enhance kitchen safety and convenience.
- Developed an IoT-enabled system featuring a whistle-counting sensor and a smart timer for automated gas shutoff.
- Integrated gas leakage and temperature sensors to prevent hazards, triggering local buzzer alarms and instant mobile notifications during emergencies.

JARVIS — Offline Ambient AI Desktop Assistant | *TechAshy Hackathon 2026* Mar 2026

- Built a fully offline AI desktop assistant with a glassmorphism Tkinter HUD, operating without any internet connectivity.
- Integrated Faster-Whisper for real-time speech recognition and LLaVA for screen vision capabilities.

WORKSHOPS & CERTIFICATIONS

Sensor Technologies: Physics, Fabrication, and Circuits (NPTEL Elite) | *IISER Bhopal, NPTEL (Funded by MoE, Govt. of India)* Jul 2026 – Sep 2026

– Completed an 8 week NPTEL course on sensor physics, fabrication, and interfacing circuits, certified Elite with a consolidated score of 69% .

Embedded System using Arduino Workshop | *Techmaghi & Kerala Startup Mission* Jul 2025

– Completed a 1-day hands-on workshop focused on embedded systems development and practical applications using the Arduino platform at the Kerala Innovation Festival.

Quantum Computing Workshop | *National Institute of Technology (NIT), Calicut* Feb 2025

– Participated in a technical workshop on quantum computing paradigms held as part of Ragam '25.

EXTRACURRICULAR ACTIVITIES

– **National Service Scheme (NSS):** Active volunteer contributing to community service and social impact initiatives.
– **Red Cross Society:** Active volunteer contributing to humanitarian, health, and emergency assistance initiatives.
– **Young Innovators Programme (YIP):** Participated in the idea submission program to apply engineering concepts to solve real-world challenges.
– **Hackathons & Ideathons:** Consistent participant in technical competitions, rapidly prototyping hardware and software solutions.

LANGUAGES

English, Malayalam, Hindi

INTERESTS

Embedded AI, Internet of Things (IoT), Open Source Collaboration
